

1. Create one VPC, with 1 public subnet and 1 private subnet.

The screenshot shows the AWS Management Console interface. The top navigation bar includes the AWS logo, a search bar, and the region 'Europe (Stockholm)'. The left sidebar shows the 'VPC' menu expanded, with options for 'Subnets', 'Route tables', and 'Internet gateways'. The main content area displays the 'Subnets (1/5)' page. A table lists the subnets:

Name	Subnet ID	State	VPC	Block P
pub-subnet	subnet-0bb49415f1c83d5a7	Available	vpc-0cece04b0b91ed69 My-VPC	Off
-	subnet-013aa013c20e28aa6	Available	vpc-04069a29bd5e93924	Off
-	subnet-010dd1c73060b54bc	Available	vpc-04069a29bd5e93924	Off
privat-subnet	subnet-0f3c2fbd9b3f14a6e	Available	vpc-0cece04b0b91ed69 My-VPC	Off

Below the table, the selected subnet 'subnet-0bb49415f1c83d5a7 / pub-subnet' is highlighted. The 'Instances (2)' page is also visible, showing two instances: 'private-ec2' and 'Pub-ec2', both in a 'Running' state.

2. Enable VPC peering for cross-region.

The screenshot shows the AWS Management Console interface for a VPC Peering connection. The top navigation bar includes the AWS logo, a search bar, and the region 'Asia Pacific (Mumbai)'. The left sidebar shows the 'VPC' menu expanded, with options for 'Peering connections', 'Route tables', and 'Tags'. The main content area displays the 'VPC Peering connection pcx-0a0aea6d5c7891af0 / CrossRegion-peering' page. A green banner at the top indicates that the peering connection has been requested. The page shows details for the requester VPC (vpc-0a0f9d17f938e7fec / VPC-MUMBAI) and the acceptor VPC (vpc-0c8ff598ae3eab79d / VPC-STOCKHOLM). The status is 'Initiating Request to 063298174631'. The expiration time is 'Thursday, 17 September 2026 at 15:17:56 GMT+5:30'. The DNS settings section is also visible, showing the requester VPC's DNS settings.

Peering connections

Your VPC peering connection (pcx-0a0aea6d5c7891af0) has been established.

To send and receive traffic across this VPC peering connection, you must add a route to the peered VPC in one or more of your VPC route tables.

Modify my route tables now
